### About Us

Construction & Property solutions (Private)Limited. was initiated in year 2017 to fill the gap between the Local Construction Industry and the Modern Construction Engineering Technology. Our high calibre team of professional expertise are prepared to cater the requirements of a wide range of engineering aspects, such as Design & build of Industrial & Commercial buildings, MEP solutions for Factory & commercial buildings, Factory floor design, Machinery installation & supportive structures for plant & machinery, Turnkey basis consultation, planning and project management of Cement base products manufacturing.

Our high calibre team of professionals consists of; Chartered Civil Engineers, Chartered Architects, BSc qualified Civil, Mechanical & Electrical engineers and well experienced Chemists, Technical officers & supervisors. Our well-equipped mechanical workshop has facilities to undertake a wide range of Fabrication and Machining work of any industry.

Stepping further in to construction industry fulfilling the total solution providing concept, CES manufactures Cement Cellular Blocks, Solid blocks and Interlock paving blocks to SLS quality standards. In the near future CES will extend its manufacturing arm to industries such as Light Weight Cement Concrete blocks, Eco friendly clay Brick and Pre-cast concrete products.

Our vision is to inculcate the practice of following engineering standards in every aspect of local Construction industry.

Our mission is to be in the category 1 of ICTAD contractor grading index in the construction fields of Civil, MEP and Special grades with ISO within next 5 years.

### Our Strengths

With hands-on experience and confident that professional founder members built up in decades of their professional career, CPS is well confident of undertaking any kind of small & medium scale construction work on turnkey basis.

We are extending our services to Design, Fabrication & Erection of Steel Buildings, Steel Roof work (New & Re-roofing) & Supportive structures, Steel Car parks, stair cases & Hand rails, Fencing, RCC building work, Boundary & Retention walls etc.

Our Managing Director Eng. Bandula Wijesinghe is a BSc qualified well experienced mechanical engineer in steel structural fabrication & erection work for over 25 years, in addition to his experience on Industrial & marine related mechanical engineering work.

Director Eng. Ajith Weniwella is a 20 year experienced BSc qualified Chartered Civil engineer having hands on experience in a vast range of modern civil construction work from Designing of steel & RCC buildings, roads, Bridges, drainage systems etc., and to total project management of medium & large scale road & building construction projects.

Director Eng. Saliya Jayasinghe is a 20 year experienced Civil engineer in building construction and project management. He is a specialist in construction of medium & large scale Steel buildings for wide range of applications and so far he has handled many largest steel buildings projects in Sri Lanka.

Down in the hierarchy our professional staff consists of BSc qualified engineers, Quantity surveyors, qualified & experienced site supervisors to take up the site work responsibility. Together with our well experienced skilled labourers force CPS is capable of taking any challenge in modern construction industry.

In addition CPS is well equipped with full range of machinery & equipment necessary for heavy & precious steel fabrication work of Construction or any other industry ; such as Arc, TIG & MIG welding equipment, Manual & PUG flame cutters, Radial & Magnetic Drills machines, Pedestal & surface grinders, Lathe, Milling & Shaping machines, Hydraulic workshop press machines, Hydraulic & Mechanical Pipe Benders, Lifting equipment, Painting equipment etc.

Our vision is to inculcate the practice of following engineering standards in every aspect of local Construction industry.

Our mission is to be in the category 1 of ICTAD contractor grading index in the construction fields of Civil, MEP and Special grades with ISO within next 5 years.
